

February: Cancer Prevention Month

February is cancer prevention month. Below you will find educational articles and videos that highlight different signs, symptoms, and risk factors on different types of cancers related to urology.

Prostate Cancer

Prostate cancer is the second most common cancer in men, globally. Although there is no way to prevent prostate cancer - there are ways to stay healthy to avoid certain risk factors.

Urethral Cancer

The likelihood of urethral cancer coming back after treatment depends on the stage and location of the initial tumor. The chance of cancer returning is lower with low stage disease, and in the anterior urethra.
