

CENTER FOR UROLOGIC CARE  
OF BERKS COUNTY

## Hello Second Location!

As part of our ongoing commitment to providing you with the highest quality healthcare services and enhancing your overall experience, we are delighted to announce the opening of our second medical office. Our new location is conveniently situated at **1270 Broadcasting Road, Wyomissing, PA 19610**, and it will officially begin welcoming patients on June 3, 2024. This expansion represents a significant milestone for us, and we are incredibly grateful for your continued trust and support as we grow.

## Welcome Dr. Jacob Lucas, DO!

We are thrilled to welcome Dr. Jacob Lucas, DO to Center For Urologic Care of Berks County! With an impressive background in urethral stricture disease, erectile dysfunction and penile prosthetics, Dr. Lucas brings a wealth of knowledge and experience to our team. His commitment to providing exceptional patient care and his dedication to staying at the forefront of medical advancements make him a valuable addition to our practice. We're confident that Dr. Lucas will make meaningful contributions to our patients' health and well-being, and we look forward to working together to continue delivering high-quality healthcare services to our community. Please join us in extending a warm welcome to Dr. Lucas as he embarks on this new journey with us.

## Featured Articles

### **Penile Cancer**

When it comes to men's health, penile cancer might not be the first thing that comes to mind. But even though it's pretty rare, especially in the United States and Europe where it accounts for less than 1% of all cancers in men, it's still something all men should be aware of. Getting diagnosed with any kind of cancer is scary, but the good news is that penile cancer is treatable, especially if it's caught early.

### **Foamy Urine**

Many people may have experienced going to the bathroom and noticing that their urine looks unusually foamy or bubbly. While it might be alarming at first, foamy urine is a relatively common occurrence. In most cases, it's nothing to worry about, but in some situations, it could be a sign of an underlying health issue. It's important to understand what causes foamy urine and what actions should be taken if it is noticed.
